

Input feature processing

Frame state -> canonical tokens -> target slots -> 561-dim policy input

Soldier1-4: nearest visible, then runtime-id order

Token schema

hero	2 x 124
tower	2 x 17
minion	8 x 22
monster	1 x 8
bullet	4 x 16
cake	2 x 6
global	19

542 token + 19 global = 561

exists is padding; visible/alive/time-since-seen are features
