

Three-stage training strategy

Basic movement -> lane aggression -> efficient win conversion

Stage I

Basic control

- walk to lane
- avoid idle
- stay observable
- safe retreat

lane_progress

lane_presence

idle penalty

feature migration

Stage II

Lane aggression

- last-hit focus
- safe trades
- valid targets
- tower windows

target pointer

Button3 mask

tower_attack

target semantics fixed

Stage III

Win conversion

- multi-hero mix
- self-play/common-AI
- disable recall
- submit ppo-5-1
